

Topic 3 EXERCISE 2 - prediction of bond type

Predict the type of bond formed between the following atoms, using electronegativity differences to explain your answers:

1. Cs and Cl
2. N and Al
3. Cl and Cl
4. Al and Al
5. Al and Cl
6. Al and F
7. Cu and Zn
8. Mg and N
9. C and O
10. C and H
