

TOPIC 7 EXERCISE 3 - ISOMERISM

1. Draw the four structural isomers of C_4H_9Cl and name them.
2. Draw the three isomers of C_4H_8 containing a $C=C$ bond and name them.
3. Draw the five structural isomers with the formula C_6H_{14} and name them. Then arrange them in order of increasing boiling point, starting with the lowest.
